LS 2150A

Series Active (Amplified-Zero Loss) L-Band Splitter

FEATURES

- Convenient, centralized rack mount designs improve cable management.
- Microstrip design provides better performance and reliability.
- Larger configurations eliminate cascaded combiners for better performance.
- Active (zero loss) combiners allow for ease in RF budget design.
- Custom configurations for optimization of rack space and increased flexibility.
- Greatly improves cable management and aesthetics by allowing for easy access to cable routing and easing identification of cabling.
- Reduces cable connector failures by eliminating the need for frequent manual connects/disconnects.
