

## CABLE PACKAGING

### Packaging that Simplifies Installations and Preserves Resources

AMT's range of innovative packaging solutions for our drop cable product line focuses on convenience, ease of handling and the environment. We offer truly innovative green packaging solutions to help minimize the use of industry standard packaging.

#### AMIGO™ ZERO Waste Reel A Truly GREEN Solution

We're taking the lead on eliminating un-necessary landfill waste and removing burdensome recycling efforts with our new **AMIGO GREEN Packaging Solution**. Specifically designed to be a friend to installation technicians and the environment, our industry unique AMIGO solution is comprised of three (3) GREEN PCT components:

- 1) **AMIGO reel-less coaxial coil** that easily installs onto our
- 2) rugged **AMIGO ZERO waste reusable hub**, that fits perfectly into our one-of-a-kind
- 3) **MOGO PRO bag**.

Two AMIGO coil and hub combinations are available: 500 ft. for MOGO PRO, and 1000 ft. for traditional A frame style cable caddies.

#### MOGO® PRO and MOGO® Reusable Cable Bags

The environmental impact of our products is a key component of our design efforts. The original, black MOGO Reusable Cable Bag was born from that approach and has long substituted the box in our reel-in-a-box packaging. The lightweight cable bag has been transformed into the mightier MOGO PRO bag, a much more rugged version made of waxed canvas with additional high quality features designed for even more longevity and user friendliness resulting in a much more versatile installation tool.

With the introduction of our AMIGO ZERO Waste packaging, we are working with you to meet the ever growing concerns about our industry's environmental impact while designing for demanding field use and recycling efforts.

#### Reel-in-a-Box

With a small plastic hub and flange, this box design delivers smooth payouts, the flexibility of 500 or 1000 ft. lengths and the convenience of a recyclable box. Reinforced handles make it easy to carry and easy to stack.

#### T-Pak

A convenient, lightweight PCT design incorporates a 500 ft. spool of cable enclosed in a small recyclable box with reinforced top handles for ease of portability. Ideal for tight spaces and long hauls, the T-Pak provides yet another portable solution for cable installers.

#### Reel

Our traditional, industry standard 1000 ft. wooden reels have been a mainstay for years and continue to provide a durable and reliable option for cable packaging. Easy pull out and compatibility with a variety of racking options, cable reels offer a solid packaging option.
